USB Instant DVD

Applications:

- Capture video from any Analog or S-VHS Source
- Convert videos to DVD, MPEG-2, MPEG-1, VCD or SVCD
- Capture and Burn DVD movies in one step
- Burn movies on DVD or CD-RW disks*
- Edit video and send back to VCR

Features:

USB Instant DVD captures video from any video device in state-of-the-art MPEG-2 DVD format, which produces smooth high-quality movies. With this DVD-format video transferred to your PC, you can:

- Burn to a DVD-R/RW or CD-RW drive in one step
- Archive home movies and videotapes in one simple step.
- Edit the video with powerful editing software, add titles, video filters, music, effects, narration & more

With the latest in video compression technology, high-quality video captured by USB Instant DVD can be:

- Burned to CD-R or DVD-R for playback on most PC & set-top DVD players
 - Published to the web for streaming playback
 - Transmitted back to videotape or displayed on a TV monitor.
- *Burn to DVD or CD-RW disc in one step requires a Pentium 4 processor. Slower processors will allow direct burn to disc media, but requires more time.
- *CD-RW drive required when archiving/authoring to CD-RW discs. DVD recordable drive required when archiving/authoring to DVD discs.

PC Requirements:

- Intel Celeron 400MHz or Duron/Athlon CPU from AMD
- Windows 98SE, Win 2000, Win ME or Windows XP
- 128 MB of RAM
- Full Duplex Sound Card with audio input
- AGP video card with 16 MB or higher
- CD-ROM Drive
- 200 MB hard disk space for capture/editing applications
- 1 GB hard disk space recommended for capturing & editing
- CD or DVD recordable drive required for direct capture
- Available USB port
